

NIH Center for Information Technology (CIT)

Statement of purpose / About — collected 2026-06-02 from cit.nih.gov/about-cit. Substituted in place of a strategic plan: CIT, as an NIH-wide IT service organization, does not publish an external strategic plan.

The Center for Information Technology (CIT) provides high-quality IT services and infrastructure systems to the National Institutes of Health (NIH) — the leading biomedical research institution in the United States.

What We Do

At CIT we provide high-quality IT services and infrastructure systems to NIH, supporting its mission to help make biomedical discoveries that protect and improve our nation's health.

Who We Serve

Over 45,000 NIH members across 200+ facilities rely daily on CIT-managed IT services. CIT supports all 27 NIH Institutes and Centers, each with specific research focuses.

How We Do It

As a service organization, CIT strives to listen to customers, empower staff, foster innovation, and provide value — delivering top-tier IT infrastructure and support to NIH and its partners.

Our Organization

Our staff of over 1,000 is split between four offices with different areas of expertise that work together to support both CIT and NIH:

- Office of Administrative Management
- Office of Scientific Computing Services
- Office of IT Services Management
- Office of the Chief Information Security Officer

How CIT Enables the NIH Mission

CIT operates platforms central to NIH-wide research computing, including:

- **STRIDES** — the NIH's official cloud platform initiative.
- **BRICS** — a data science platform connecting the global research community.
- **Biowulf** — the world's largest biomedical supercomputer, supporting NIH intramural research.

Leadership (as of collection)

- Dr. Sean Mooney — Director
- Ivor D'Souza — Deputy Director
- Kevin Davis — Executive Officer and Director, Office of Administrative Management
- Nick Weber — Acting Director, Office of Scientific Computing Services
- Xavier Soosai — Director, Office of IT Services Management and CIT CIO
- Jothi Dugar — CIT Chief Information Security Officer
